Scrabble Pal

In Dart

K.Preethi P.Divya

23-06-17

Dart

- object oriented language.
- interpreted
- class defined

Problem statement:

- return the possible word
- return the total score
- it should give the required position word

Problem approach:

- Assigning the score to each alphabet
- Adding score of the word
- including Sowpods dictionary
- concept of anagrams
- returning the required position word

code structure:

- classes-2
- functions-4
- number of lines: 199
